

Abbreviated Vita

Michael K. Wohlgenant

Dr. Wohlgenant is William Neal Reynolds Distinguished Professor of Agricultural & Resource Economics at North Carolina State University. His specialty is development of economic models of agricultural marketing, policy, demand, and price analysis problems. He has developed economic models to understand farm to retail price linkages, consumer demand, market supply/demand, and the effects of advertising. Dr. Wohlgenant has had extensive commodity experience, including work on applied price and marketing problems for cotton, dairy, beef, pork, grapes, sugar, tobacco, wine, and horticultural crops. He has made important contributions to our understanding of the allocation of checkoff funds between research and advertising. He was an innovator of the equilibrium displacement modeling approach which is extensively used in policy and welfare analysis. His work has been published in professional journals, including the *American Journal of Agricultural Economics*, *Review of Economics and Statistics*, *Australian Journal of Agricultural and Resource Economics*, *Journal of Agricultural and Resource Economics*, and the *European Review of Agricultural Economics*. His contributions to agricultural economics are numerous and his research is widely cited and recognized by awards, with Best Article awards in four journals including the *American Journal of Agricultural Economics*. He is also a recipient of the Publication of Enduring Quality Award by the American Agricultural Economics Association. Dr. Wohlgenant is past editor of the *American Journal of Agricultural Economics* and prior to that time served as an associate editor of the *American Journal of Agricultural Economics*. He has served as an economic consultant for a number of organizations, including the Research Triangle Institute, and the Food and Agriculture Organization of the United Nations, for various law firms in expert witness testimony (including expert witness testimony before the U.S. International Trade Commission). Dr. Wohlgenant has been called upon to be a consultant to the North Carolina legislature on economic issues related to the N.C. swine industry, the U.S. Department of Agriculture's Economic Research Service, and the U.S. Government Accountability Office. He also has served as an external reviewer of outside research programs. Dr. Wohlgenant teaches both undergraduate and graduate courses in economics and agricultural economics at North Carolina State University. He has served as chair or co-chair for twenty-five Ph.D. students, many of whom hold prestigious positions in academics, government, and industry. He has received numerous awards for his research and teaching, including a William Neal Reynolds Distinguished Professorship. Dr. Wohlgenant was elected a Fellow of the American Agricultural Economics Association in 2001.
