TOTAL COSTS	850 LBS	TOTAL COSTS	\$0.65

\* This budget was developed for planning purposes only and does not include storage cost, land rent, or government payments

\*Prices paid to farmers are subject to change based on global, national, and local market conditions, budget represents futures + or - local basis

\*Fertilization rates are not a recommendation but a estimate of realized cost based on: <https://articles.extension.org/sites/default/files/fertilization.pdf>

\*Machinery fixed and variable cost assume a round bale cotton picker not requiring a module builder, each farm will need to consider how these distribute over their farming operation based on their number of acres as these budgets assume ideal farm size to leverage savings from equipment

\*Herbicide cost represent three sprays at retail pricing, many cotton acres are sprayed four times over depending on year, soil type, and location
