SENSITIVITY ANALYSIS

The tables show A) Returns to land, overhead and management, a profit measure, and B) Cost per head, under various assumptions about costs and returns. Specifically, the cost and returns shown in the enterprise budget are believed to be fairly representative of North Carolina conditions but there is a wide variation in heifer raising systems and in farm performance among farms. Also, costs and the value of heifers change from year to year. Table a shows the effects of revenue and costs that are higher and lower than for the basic budget. Similarly, Table B shows the effects of total raising costs that are higher and lower.

A. RETURNS TO LAND, OVERHEAD AND MANAGEMENT:

B. TOTAL COST PER SPRINGING HEIFER RAISED, EXCLUDING THE VALUE OF THE HEIFER CALF:
