

NC STATE UNIVERSITY

CROP AND SOIL SCIENCES

Job Title / Position: Crop Science Graduate Research Assistant (GRA). MS or Ph.D. Weed Science with an emphasis in pesticide environmental fate in agronomic systems.

Location: North Carolina State University
Department of Crop and Soil Sciences
Raleigh, NC 27695-7620

As a land-grant university, North Carolina State University is an internationally-recognized center for innovative research and graduate training.

Job Description: Conduct field-, greenhouse-, and laboratory-based research with a project focused on pesticide environmental fate and based on the interest of the student. Students will interact with a team of NC State researchers and collaborate with other faculty within the department.

Qualifications: B.S. degree in Weed Science, Turfgrass Science, Agronomy, Horticulture, Plant Science, Biological Science, or closely related field is required. Experience and/or knowledge of experimental design, data analysis and/or field-based research is preferred. Excellent written and oral communication skills are essential. Student must be highly motivated and able to work both independently and as a team member.

Stipend: Annual stipend will be provided. Tuition and health insurance will be covered by the Graduate Student Support Plan
